EAST and Sequence Search	6/24/2008	JC
Enablement and Written description consulted with Ms. Eyler Bonnie. Both OK.	7/3/2008	JC
Overall ok for enablement- it merely is a screening for drug modulating PRSC1.		
For PRSC1- applicant's mRNA profiling in tissues ok with activity since Board Appl Interfer has affirmed this mRNA- protein- activity in general. Unless examiner found exact PRSC1 has no correlation of mRNA and activity.		
For determining "activity" of PRSC1 is OK for both written description and scope of enablement, even though the sepc indicates the PRSC1 covers 80% to 99% homology of SEQ ID No. 2- Because the claim recites determining "activity" of PRSC1. - which is the binding, enzymatic cleavage..etc. in the spec
